

**AMERICAN**  
ROOFING SYSTEMS

## Designed for Durability... American Roofing Systems

Our roofing materials are designed to deliver long lasting performance through modern, state-of-the-art technology. Backed by our industry unique solutions approach, American Roofing Systems ensures you advanced, premium products, world-class service, and a team of professionals who possess the experience and integrity to champion our durability commitment.

## Sustainability... A Philosophy of Responsibility

Our number one priority is to maximize the life cycle of your roofing investment and eliminate the need for premature roof replacement; thereby preserving your capital. American Modified Bitumen membranes contribute to the success of dependable, durable and sustainable roofing systems. These membranes combine the advantages of built-up roofs and multi-ply construction. Not only are American Modified Bitumen membranes fiscally responsible by maximizing life cycle, but environmentally responsible as well by reducing the carbon footprint associated with roof replacement and landfill waste.

## Modified for Performance

- ★ Long-term durability and field proven performance
- ★ Custom engineered and system tested for optimum rooftop endurance, dependability and value
- ★ Premium polymer modified coating formulations
- ★ Innovative reinforcement constructions
- ★ Superior weathering and versatility
- ★ Puncture resistance
- ★ Waterproofing redundancy
- ★ Exceptional elongation
- ★ Performance matched to enhance cold-applied, hot-applied, or heat-welded system specifications

**AMERICAN**  
ROOFING SYSTEMS

## Difference by Design

- Premium polymer modified asphalt coatings and reinforcements
- Cool Roof surface membrane
- Exceptional granule adhesion
- Maintenance friendly design.

- Superior physical properties, durability and waterproofing characteristics
- Increased potential for energy savings associated with enhanced system reflectivity and remittance properties.
- Extended roof system life-cycle.
- Long-term defense against system degradation due to UV attack, impact and harsh climate conditions

American Roofing Systems for Maximum Weatherproofing Security American Roofing Systems leads the industry in offering the newest innovations in superior products, including environmentally responsible solvent-free roofing products, ply and flood coat adhesives, penetration pocket fillers and insulation adhesives. Being focused on unparalleled customer and technical service, we strive to produce the highest quality products and deliver 100% customer satisfaction.

American Roofing Systems is dedicated to delivering sustainable products and services .
